

## Housing & Mounting - Small Size

18 Gauge welded steel measuring 8.63"L x 5.75"W x 3.1"H with 5 knockouts. Built-in mounting bracket is designed for easy installation for both 6 planes of surface mounting and suspension by two 1/4" threaded rods. Standard finish is white powder coat.

## Toroidal Transformer - Dual Tap (DT)

The Q6 Series Power Supply Center, utilizes two (2) primary taps (12V, 13V or 24V, 26V). Loads may be connected to one (1) of the primary taps up to the full watt rating of the Power Supply Center. The advantage is that the PSC can be tapped to recover voltage drop and produce between 85%-100% light output. See voltage drop calculator on page 10.

## Secondary Circuit

Protected by up to three magnetic circuit breakers. Appropriate size to the feed load per N.E.C. Article 411 (not to exceed 25 amps per load). All wiring by a certified electrical contractor must be Class 1 compliant to N.E.C. Chapter 3. Available in 5A, 10A, 12.5A, 15A, 20A, and 25A.

## Toroidal Choke

A Choke or "Debuzzing Coil" comes standard on every Q6S unit (except 50W-100W) to reduce noise and in-rush current. A choke is especially helpful when dimming. NOTE: Not required for 50W & 100W transformers.

## Mounting

Standard - 6 plane surface mount  
 Standard - Rod suspension (2 - 1/4" threaded rods)  
 Optional - Junction Box.
